

## Steps to Add the Disco Script:

1. In your **Disco Dashboard**, find your **Publisher ID** under [Settings > Privacy > X-publisher](#) and copy it
2. Go to **Settings** in your Shopify admin page.
3. Navigate to the **Checkout** section.
4. Scroll down to the **Additional Scripts** area.
5. **If you already have custom scripts** in this section:
  - Add the following Disco script **at the top** of the existing code.
6. **If there are no scripts** and the section is hidden:
  - Enable editing by opening the **Inspector** (right-click and choose *Inspect*).
  - Remove the `hidden` attribute or any CSS class hiding/disabling the section.
  - Then, add the following Disco script.

```
<!-- Disco Start -->  
<script type="text/javascript"  
src="https://d1zcmvsklxjbur.cloudfront.net/static/disco.js?publisher_id=<<publisher  
id>>&environment=production"></script>  
<!-- Disco End -->
```

 Replace `<<publisher id>>` with your actual **Publisher ID**.
